SYSTEMS

Imagine

Architecture Meets Landscape

Blending architecture and landscape is sometimes a complicated task when functionality, aesthetic appeal and eco-friendly criterion need to be considered. Grasscrete Systems by Bomanite provide a variety of landscape solutions and still maintain a sustainable green product design. Grasscrete is a cast-in-place, monolithic, continuously reinforced, pervious concrete pavement system that provides superior structural integrity and performance.

Imagine The Possibilities.

Functionally Beautiful and Environmentally Friendly

The Grasscrete System can be purely functional or operate as a concealed product that is both practical and pleasing in appearance. Ideal for emergency access lanes, delivery access routes, maintenance access, embankments, overflow parking areas and intermittent drainage channels to help prevent erosion, Grasscrete offers the ability to provide year-round access for a variety of applications without compromising the aesthetics of exterior landscaping.

Stormwater Runoff Reduction

Grasscrete Systems are ideal solutions to problems created by the alteration of natural stormwater runoff patterns. By reducing runoff, Grasscrete actually increases ground water recharge thorough infiltration, while improving the quality of the water supply and preventing erosion due to storms and floods. Because Grasscrete allows rainwater to seep into the ground through the pavement, ground water is recharged, water resources are preserved and stormwater runoff is reduced.

Durability Meets Beauty

Grasscrete is engineered to provide long-term durability, low maintenance and structural strength. Because of its structural integrity and continuous reinforcing,

Grasscrete is not subject to the differential settlement that can occur with precast and interlocking products. Grasscrete stays flat under the heaviest traffic – even when the subbase becomes saturated.

Installed By The Best

When you specify Grasscrete by Bomanite, rest assured that your project will be installed by a highly skilled, specially trained and licensed Bomanite Contractor. Contact your local Bomanite Grasscrete Licensed Contractor today to create durable, sustainable, eco-friendly solutions for your next project.

Your authorized Bomanite
Grasscrete Licensed Contractor is:
